

Classworks®

Parent Guide

YOUR CHILD IS USING CLASSWORKS FOR REMOTE LEARNING!

Classworks is online math, reading, English language arts and science instruction for students in grades K-8. We support teachers with high-quality instruction that helps them integrate technology into daily classroom learning.

Your child will work on lessons as directed by their teacher. Here are some examples of the activities they might see in Classworks: Reading passages with questions and written responses, math problems for students to model their work, and lessons that have been individualized to their unique ability level.

Remember - if students get stuck or have questions about specific activities there are tutorials at the beginning of each section.

WHAT CAN YOU DO TO SUPPORT LEARNING AT HOME WITH CLASSWORKS?

Your child's teacher should provide you with a roster card containing their username, password, and link to log in. They may also offer a suggested schedule if schools are closed.

To ensure that the device they are using meets the minimum specifications needed for Classworks, click the "Check System" link on their Classworks student login page.

Your Classworks URL:
Use the link listed here to log into Classworks

Provide a quiet learning environment for your child. If students need help completing activities, there are video tutorials listed before each exercise. When in doubt, always reach out to the teacher directly. Celebrate your child's progress! Ask them to show you any badges or trophies they've earned using their My Scores dashboard!

HOW DO YOU TRACK YOUR STUDENT'S PROGRESS?

Keep track of your student's progress in Classworks with the My Scores dashboard! When a student is logged into Classworks they can navigate to their My Scores dashboard to get a shareable link. This link is good for the entire year. Bookmark it to see what your child is working on and how they are performing in each subject.
